PROFILE

I care about the research & data process of bringing the product to life.

Taking the problem, breaking it down, and crafting the experience around it by understanding, empathy & iterating.

I've worked with fast-moving teams delivering products under tight deadlines in agile methodologies.

I enjoy modeling user flows, wireframes and prototyping ideas.

I have front-end coding experience & support cooperation with devs for the final product build.

I love learning new hobbies and skills, am always looking for new challenges.

I am actively investing time in learning UI/UX, 3D Modeling & Animation.
